

1 Nursing Insurance System

The Nursing Insurance System is a program in which the society as a whole supports nursing care costs to ensure that residents can continue to live in their residential area without difficulty when they are in need of nursing care. Multiple services are available so that they can live as independently as possible.

All residents aged 40 and older are required to enroll in and pay premiums for the nursing care insurance scheme. Insured persons certified as being in need of long-term care may receive nursing care services by paying part of the costs (in principle, 10%, 20%, or 30%).

《Procedures to receive nursing care services》
